Bombardment of One of the Outer French Forts at Paris.

The French Army of the North Still Retreating.

Scheme to Assassinate King William Discovered at Versailles.

Six English Ships Sunk in the Seine by the Prussians.

Completion of the Mont Cenis Tunnel.

FRANCE.

THE PARIS BOMBARDMENT CONTINUED.

Paris, Dec. 27.—A severe bombardment of Mont Avron, commenced yesterday morning at 7 o'clock, continued without intermission during the night, and is now in progress. A number of embrasures have been constructed on the crest of Mont Avron, and the guns are protected from the enemy's fire by a parapet of sandbags. The fire of the French artillery is reported to be very effective. The Prussians have not yet replied to the fire from Mont Avron.

ASSASSINATION SCHEME.

NEW YORK, Dec. 28.—The World's London correspondent telegraphs that a scheme to assassinate the King of Prussia, Count Moltke and Bismarck, was discovered here a few days since. A number of attempts were made to assassinate the King of Prussia during the siege of Paris, and he escaped only through the merest chance. Count Moltke is constantly on the alert to guard against the attempts of fanatics, and Bismarck is in constant fear of death. The scheme to assassinate the three leaders mentioned was discovered only a few days since, and the plot was frustrated by the arrest of the conspirators. The details of the plot are not given, but it is said that the conspirators were to attempt the assassination of the three leaders at the same time.

THE SIEGE.

London, Dec. 27.—Liberalities has just been received here of a distinctly optimist which has been kindly interpreted by a correspondent of the Times, which, however, is not endorsed. The English correspondent of the Times, who has been with the army of the Loire, and who was arrested by the Prussians at Versailles, and released by Bismarck's order, has arrived in the city on Wednesday from the north. He says he has witnessed nothing to confirm the rumors of disaster received by telegraph, and that the army of the Loire is in good condition and in no danger of destruction. He says that the army of the north is also in good condition, and that the reports of defeat are unfounded. The correspondent of the Times at Versailles telegraphs that the Prussians have begun to bombard Mont Avron.

LONDON, Dec. 27.—The Prussians have begun to bombard Mont Avron. The Journal des Debats says that the Prussians have begun to bombard Mont Avron, and that the French have replied with great vigor. The Journal des Debats says that the Prussians have begun to bombard Mont Avron, and that the French have replied with great vigor. The Journal des Debats says that the Prussians have begun to bombard Mont Avron, and that the French have replied with great vigor.

Waiting for the Trial.

The New York Tribune is fast in the field in defending the propriety of re-nominating President Grant, under the impression that, if renominating does nobody shall or ground conflict that ques-

[illegible]

[illegible] Grant's [illegible] Chase. That idea having been [illegible] Mr. Greeley's personal regard than for President Grant, [illegible] we can see no [illegible] in Mr. Chase. It is not [illegible] pose to dictate the direction or the motives of Mr. Greeley's preference, but even the wishes of the "one-term party" in the matter do not [illegible] the government of conventions.

As a personal consideration in the contention, it has seemed to us very doubtful whether the people should be restrained from re-electing a President because he did not [illegible] to be a candidate for a second term. Washington, Jefferson, Madison, Monroe, Jackson, Lincoln, and Grant have all been re-elected [illegible] and the [illegible] Jefferson, Jackson, Lincoln, and Grant were all [illegible] Washington was [illegible] Madison, Monroe, and Jackson declined [illegible] Jefferson declined [illegible] Lincoln

SEA MOSS FARINE.

THE NEW FOOD SOURCE.

SEA MOSS FARINE.—This pure and splendid preparation, made from Irish Moss, or Carrageen, is conceded to be the cheapest, healthiest and most delicious food in the world. As a delicacy for the dessert it has no equal, and is a light and delicate food for invalids and children. It is superior to all kindred preparations.

This new article of food has everywhere won "golden opinions" of all sorts of people, and the housekeepers of the land generally regard it in the double light of a staple necessity and a delicious luxury, for while it becomes the supreme of living, the exquisite dishes prepared from it cannot be obtained even at an extravagant cost from any other source. For twenty-five cents you can buy a package which will make sixteen quarts of Moss Mange, and a like quantity of Puddings, Custards, Creams, Charlotte Russe, &c.

THE GREAT
Spring & Summer Tonic.

Medical treatment has been revolutionized, and at last the discovery has been made that RENOVATION, NOT PRODUCTION, IS THE TRUE MEDICAL PHILOSOPHY. The introduction of PLANTATION BITTERS, prepared with pure St. Croix Rum and Calisaya Bark, opened the eyes of the world to this great fact. The life-restoring principle embodied in this great Vegetable Restorative is manifested in the weak and despairing by an immediate and most encouraging change. If the appetite has failed, it is quickened at once; if the nerves have been painful and unquiet, it becomes strong and steady. If the liver is torpid, it is roused and regulated; if the muscles are relaxed, they are strengthened and restored; if the brain has been benumbed by morbid humors, they are put to flight, and hope and cheerfulness return. In the face of the extraordinary cures of criminal debility, dyspepsia, biliousness, constipation and mental despondency, wrought by Plantation Bitters, no practitioner can in honor with death and the undertaker could persist in it. The terrible ecstasies which were once prescribed as Spring and Summer medicines have nearly lost their prestige. The sick will not take them, and Plantation Bitters, in which are combined the elements of a delicious tonic, an invigorant, a mild laxative, a narcotic and anti-bilious specific, retains in their
